

STATIONS BLACKLISTING K1SIX

TOTAL Blacklisted by: **10** For me: No QSO ONE YEAR (or LIFE)?¹ [Click Link>](#) [Seinfeld](#)
Last Updated: **18-Aug-2024** DXCC: **1** States: **7** Grids: **7**

CALLSIGN REASON CODE

50 Logger All chat pages. First censored then banned at the IP level.
K0GU Sez I'm a drug addicted "Babbling Piece of Crap" and my wife has Genital Herpes.
K11VT² **DNC**. FN43 NH. 11.5 miles near line of sight in direction of Europe.
N2EME⁴ Disagreement about placing beacons on WSJT calling frequencies. Called us "Luddites".³
N4EME³ Disagreement about placing beacons on WSJT calling frequencies. Called us "Luddites".
NW1B² **DNC**. FN43 ME. 82 miles near line of sight in direction of Europe.
ON4KST⁵ Unknown. All pages. I received this (local) FT8 message on 6m: "BLACKLISTED" and then...
W1UX⁶ **DNC**. FN53 ME. 63 miles only +6 dB in direction of Europe. Possible FT8 CQ Beacon.
W4TP⁶ **DNC**. EM60 FL. Unknown, possibly in WSJT-X later version (*spinoffs*) "Ignore list".
WB1GQR⁶ **DNC**. FN33 VT. Unknown, possibly in WSJT-X later version (*spinoffs*) "Ignore list".

Note¹: Of course, nobody is under any obligation to allow me to work them but by all means please have the backbone to inform me if I am on your blacklist. *This will help to reduce needless QRM from me to you and for others that may be calling you. Please take just a moment to [click on THIS LINK](#).* Focus on the upper right hand portion of the chart and note the number of locals in this area < 250 miles distant. Stations < 150 miles are quite susceptible and stations < 50 miles are very susceptible to interference from me. This is hard to escape when we are all jammed into a 3000 hz bandwidth channel on FT8 and things must be handled differently than more conventional modes. For me this means not transmitting at all if I can't do so efficiently and if someone refuses to respond- it's OK and if it's consistent then I know not to call this station again. *SPECTRUM has VALUE!*

Note²: "**DNC**" is my Do Not Call list. *These are potentially new initial 6M digital contacts only!* If, after numerous attempts at a QSO on varying dates, AND on each failed attempt at a QSO I note that the station I am calling hears me well on PSKreporter, THEN evidence strongly suggests that the failure to communicate is intentional which is fine. Once I am aware that calling this station is a complete waste of valuable airtime and a high risk of interference to others, I place the callsign in the "**DNC List**" and simply won't call them. *AIRTIME is VALUABLE* and interference levels are rising. FT8 is different!

Note³: We had to look up the meaning of "Luddite" and all learned a valuable historical lesson. I used The Google Search Engine for my research. It was not necessary to look up the meaning of any of the 4 letter profanities spewed at us on the ON4KST site afterwards.

Note⁴: 6M FT8 and/or MSK144 modes as a minimum at this time.

Note⁵: IP Address Blocked error on all pages of this chat site. Believed to be some form of punishment which should greatly impact my 6M EME operations if not shut them down.

Note⁶: Some stations may enter you in their "ignore list". If this occurs, the caller may cause QRM to others if not aware. I list those potentials here and enter in my "**DNC list**"² for future ref.
